250	Zephirine Drouhin. H.Bour. Vivid pink. A most desirable climber.....	4.00	35.00

## For Handsome Profits, Handle Hugonis!

### "Golden Rose of China"

"Best hardy yellow Rose we know of, and most popular species in America."

Dr. E. H. Wilson, Arnold Arboretum

A remarkably hardy shrub Rose with clear yellow, single flowers growing on the branches like golden hollyhocks in late April or early May, **Hugonis** makes a symmetrical bush about 6 feet wide and as high when matured. The reddish maroon canes are in themselves most attractive and the small acacia-like foliage turns purple in the fall. You have the chance to get all of your **Hugonis** here, from the most plentiful supply in America, and we feel certain you will agree, on seeing them, that they are absolutely the finest to be had, bar none. The plants are so good that you will have plenty of uses for them, for they'll make you splendid specimens as well as desirable features for the shrubbery border, the driveway, the garden background, the corner, or a handsome hedge. Plan to use a lot of them! The price this season is much less than one-tenth of the original selling-figure. That means your profits are greater, too. Better buy now!

### Vigorous dormant plants, field-grown (O. R.)
